

We have extracted the windows 7 cursors for you.

How to Install:

- Extract the archive to a temporary folder.
- Right click the "Install.inf" file and click on "Install"
- Choose the cursor set in the control panel mouse applet It appears as "windows 7 cursors"

Troubleshooting:

-When the shadow on the cursors look bad (which can happen on some systems) you should turn 2D hardware acceleration a notch down. You can do that this way:

- Display Properties -> Settings -> Advanced -> Troubleshoot \*Set "Hardware Acceleration" one notch down.
