

Windows 7 Start Button Creator is a free tiny portable tool that allows you to create a **Windows 7 start orb/button with ease**

Here is what we will end up with.

How to use:

1. Run the tool.

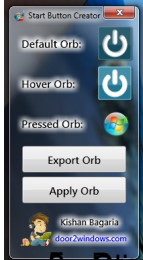

2. Click on the image near **Default Orb**.

Windows 7 Start Button Creator : Create Windows 7 Start Buttons With Ease

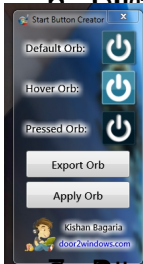

Written by Daniel L. - Last Updated Saturday, 03 July 2010 15:29

1. Browse for the image that you want to use as the default orb state.

2. Browse for the image that you want to use as the hover orb state.

3. Click **Export Orb** that you want to use as the pressed orb state first then click **Apply** to save the changes.
