

Ok, yea we know this has nothing to do with PCs or computers but it is too cool to ignore. If you are a PC nut you most likely have played Halo at some point and have used the MA5B assault rifle. This is the classic gun for Halo. Well someone has put A LOT of time to move it from the virtual world into the real world, and it is impressive. It is a fully functional replica, except it is a Nerf gun...Take a look at the video below

SOoooo why would you spend time making this? Who cares!! Its awesome! Hats off to this guy for taking the time to make the gun, and it looks like he also has some movie making skills...great job!
