

"No installation, just copy to your %Program Files% folder. And run whichever .exe you need.

Instructions included.

-Adjustable opacity (darkness)

-Option to run at startup

Other than the ability to right click the shadow, it is non intrusive and doesn't show anything in the system tray.

Right click the shadow to choose preferences or to close it.

There may be a very slight chance that this won't work for your setup. Therefore, no support is given for this program."([sweatyfish](#))

You can download it using following link:

[Download Taskbar Drop Shadow.](#)
